Instructor Onboarding

Current Status

Verified on March 16, 2026 against the live Supabase-backed portal.

Verified instructor workflows:

- login and route protection
- dashboard load
- attendance update
- student instructional note creation
- session instructional note creation
- instructor follow-up flag creation
- direct access to `/families` and `/messaging` correctly redirected back to `/dashboard`

What Instructor Is For

Instructor is the narrow teaching role.

Instructor owns:

- attendance for assigned sessions
- instructional context for assigned students
- read-only trend review

Instructor does not own:

- family messaging
- billing
- settings
- resource publishing
- score entry
- staffing or schedule edits

Core Boundaries

Instructor can:

- access `dashboard`, `calendar`, `cohorts`, `attendance`, and `academics`
- update attendance for assigned sessions
- update tasks assigned to them
- create student instructional notes
- create session instructional notes
- create follow-up flags for a student or session
- read classroom accommodations
- review teaching context for assigned students

Instructor cannot:

- open `students`, `families`, `messaging`, `billing`, `integrations`, `programs`, or `settings`
- view guardian contact detail pages
- change schedules or staffing
- use TA checklist or coverage tools

Screens

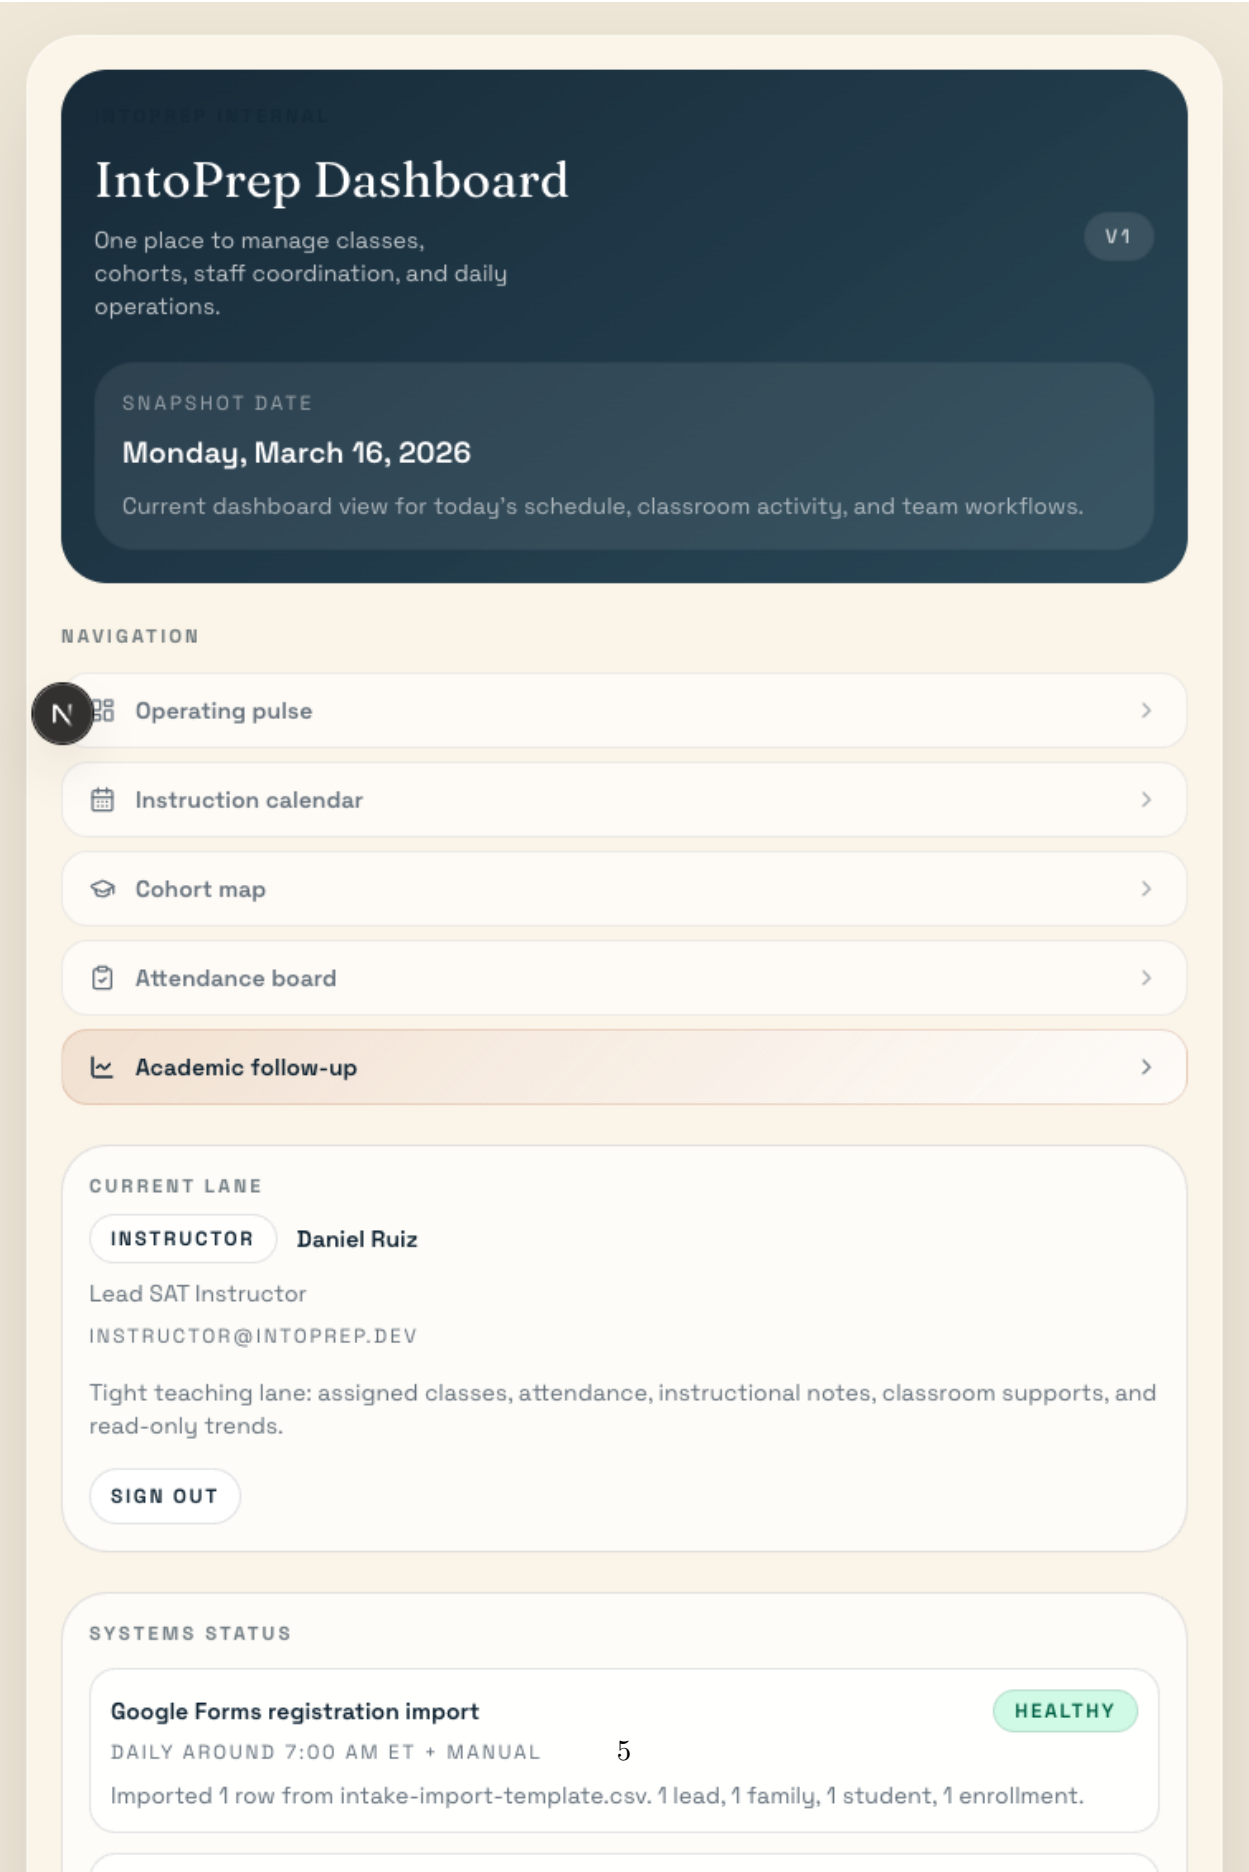
Instructor Academics



First Login Walkthrough

1. Sign in at `/login`.
2. Start on "Operating pulse".
3. Review:
    - assigned sessions
    - assigned tasks
    - trend snippets for assigned students
4. Open "Attendance board".
5. Open "Academic follow-up".

Daily Workflow

1. Start On The Dashboard

Use the dashboard to confirm:

- today's teaching blocks
- current assigned work
- high-level trend context

2. Update Attendance

Open "Attendance board" for your assigned session.

- mark attendance
- review teaching context on the current roster
- confirm the session is ready from the instructor side

Smoke test verification:

- instructor attendance update succeeded on "session-sat-mock"

3. Add Student Instructional Notes

Open "Academic follow-up".

- document student-specific instructional context
- keep the note operational and classroom-focused

Smoke test verification:

- instructor student note creation succeeded

4. Add Session Instruction Notes

Use the session note area in "Academic follow-up" to capture what the teaching team should remember about a specific class block.

- select the session
- enter a concise internal note
- let the autosave complete

Smoke test verification:

- instructor session note save succeeded

5. Create A Follow-Up Flag

Open "Attendance board" and use the "Needs follow-up" area.

- choose whether the flag is for a student or the session
- add a short summary
- add optional context for TA, staff, or admin
- submit the flag

Smoke test verification:

- instructor follow-up flag save succeeded
- the new flag appeared in the TA dashboard follow-up watch

Complete Capability Map

Instructor is the tightest teaching role in the portal.

Use instructor for:

- attendance
- assigned tasks
- student instructional notes
- session instructional notes
- read-only trends
- read-only classroom accommodations
- lightweight internal follow-up flags

Do not use instructor for:

- family communication
- billing
- score entry

- resource publishing
- staffing or schedule changes
- checklist, coverage, or TA support tooling

How To Work Assigned Tasks

1. Review the teaching queue from the dashboard.
2. Open the assigned item.
3. Update status and progress notes as work moves.
4. Keep notes short and instructional, not administrative.

How To Use Read-Only Accommodations

1. Open “Attendance board” or “Academic follow-up”.
2. Review the accommodation badges or support notes for the current student.
3. Use those supports in the classroom.
4. Do not try to edit accommodation content from the instructor role.

How To Use Trend Review

1. Open “Academic follow-up”.
2. Select the student.
3. Review the latest score picture and trend direction.
4. Use that context to guide teaching, but do not enter or change scores from this role.

How To Use Calendar And Cohort Views

- calendar: use it to confirm when and where your assigned sessions are happening.
- cohorts: use it to review the teaching group context for assigned classes.
- both views are read-only from the instructor role.

Guardrails

- no family pages
- no messaging pages
- no billing pages
- no schedule edits
- no checklist or coverage tools

Verified Behavior

Verified in the live browser pass:

- instructor login succeeded
- dashboard, attendance, and academics loaded
- attendance update succeeded through the live API
- student note save succeeded through the live API
- session note save succeeded through the live API
- instructor follow-up flag save succeeded through the live API
- direct access to `/families` redirected back to `/dashboard`
- direct access to `/messaging` redirected back to `/dashboard`

Recommended First-Day Checklist

- review dashboard and current sessions
- update attendance on one assigned session
- add one student instructional note on an assigned student
- add one session note on an assigned session
- create one follow-up flag on an assigned student or session
